## *Our New Antimicrobial Filter*

*"An integral part of frontline defense"*

**Contact us for more information.**

### **An Affordable Air Quality Solution**

We truly care about the health and well-being of our customers and are happy to be able to offer an Antimicrobial Filter.

**1. Antimicrobial Shield** - minimizes the growth of microbes on air filter surfaces and reduces the chance of microbial "grow-through" and downstream spore distribution

**2. Tackifier** - increases the efficiency of the air filter and ensures particles remain trapped in the filter

HVAC air filters are an integral part of frontline defense against indoor air microbial problems in our modern buildings. Upgrading the efficiency of air filters by adding a durable, safe and effective antimicrobial treatment can protect your air filter from abnormal fungal growth and improve indoor air quality.
